### WINEMAKER'S NOTES

The vineyards from which these grapes are picked are more than 20 years old. Fermentation takes place at a controlled temperature of around 25°C and maceration lasts 10 - 12 days depending on the condition of the grapes. When alcoholic fermentation is complete, the wine is subjected to 6 months of micro-oxygenation in wine-making tanks in order to round it off and enhance its structure and aromas. Part of this wine has been lightly aged for 3 months in American oak barrels.
